

Secure Storage | Specialist Key Cabinets

Our range of Key Cabinets extends to include Specialist Key Cabinets with a clear perspex panel in the front to allow for a quick visual check of which keys are currently out & in use without the requirement to unlock the cabinet.

Our Specialist Key Cabinets are Bronze rated and are ideal for use in controlled areas, such as security control offices, and allow for easy access in case of emergency as perspex can be broken if necessary. Key locations can be recorded using the control index, which can also be removed to ensure the use of each key is not known should unauthorised access to the cabinet be gained.

- Multiple sizes available to hold between 24-50 keys
- Fitted with key lock as standard
- Adjustable colour coded and numbered hook bars
- Removable control index card provided
- Padlock Cabinets available to store up to 100 keys/padlocks
- Emergency Key Boxes available in 6 models

In addition to our Specialist Key Cabinets, we also offer Padlock Cabinets and Emergency Key Boxes. Our Padlock Cabinets are available in 3 sizes and have been specially designed for the storage of padlocks and keys. These Padlock Cabinets offer a capacity of up to 100 keys, with extra deep hooks staggered & spaced 60mm apart throughout for optimal key & padlock storage.

Our Emergency Key Boxes are available in 6 different models and have been specially designed for the storage of restricted keys near to a locked door in the event of an emergency where access is urgently required. The Emergency Key Boxes are constructed from solid steel with a 2mm break glass or solid front.
