

Safe Locks | Axessor IP

 36 Users  Audit Trail  Time delay / Time Lock

The Dormakaba Axessor IP Digital Safe lock can be networked or used as a stand-alone unit. It is the ideal safe lock for organisations with large branch networks, such as banks, post office, retail and restaurant chains.

It can be used wherever organisational flexibility, fast response and increased security are required.

The Axessor IP can be linked with the Axessor Connect lock, increasing the number of locks/doors controlled to 14, whereas, without the Connect, the maximum controlled is 10.

SPECIFICATION:
