

## Safe Locks | Cencon 2000

 Unlimited OTC Users  Audit Trail  Time delay

The Cencon ATM Cash Vault secure lock system from Kaba was designed to combat insider theft from ATMs through the combined use of lock hardware, systems software and Smart Keys. Cencon offers total access control and accountability with its One Time Combination (OTC) feature. The OTC is dispatched from the user's software and can only be used by that particular key for that lock's next opening, thus eliminating temptation.

Unique software allows you to control and monitor thousands of locks and users located anywhere in the world – from one central location. Utilising the Kaba Cencon 2000 lock provides a cost-effective solution to today's most serious security challenges.
