

Perimeter Security | Bollards

Security bollards create both a physical and visual deterrent, providing segregation and anti-ram solutions for a vast array of commercial premises. Our Security bollards are available with a variety of fixings, designs and finishes to suit both the environment and use. These fixing types include telescopic, removable, root fixed and fold down to allow temporary vehicle access when required, ensuring we can provide an ideal solution for all of our clients' needs.

We offer two different types of Security Bollards; a removable solution, and a fold-down solution, allowing our customers to select an option that ideally fits their perimeter security requirement.

Removable Bollards

These bollards offer an ideal solution for use on driveways and forecourts and due to their design we can provide assurance that these Bollards provide a robust solution that clearly stands out day or night. Our Removable Bollards are fitted with a high-security integral 10 pin push lock which is supplied complete with 2 keys and the post is easy to remove when access is required.

- Powder-coated yellow finish
- 3mm thick hollow steel construction
- Highly visible
- 10 pin push lock
- Ideal for securing driveways and forecourts
- Easy to remove when access is required

Fold-down Bollards

Our Fold Down Bollards offer an ideal solution for premises who require the repeated removal of the post, this fold-down Bollard collapses to 90mm when not in use, to allow full use of the surrounding area whenever necessary. The simple fold-down mechanism ensures that Bollards can be erected and collapsed in seconds once unlocked.

- Powder-coated yellow finish
- 3mm thick hollow steel construction
- Highly visible
- Folds down when not required
- Supplied with 70mm hardened shackle padlock (MC10)
- 4 x 8.5mm diameter holes in the base plate for surface mounting
