

Security Doors | Steel Doors

In addition to our range of Security Rated Doors, we offer a range of standard Steel Security Doors which offer a perfect solution for properties with low to medium risk requirements. These Steel Security Doors provide a wonderful option for premises to protect their business assets by preventing unauthorised access from being gained.

Similar to our Security Rated Doors, our standard range can be tailored to meet your individual needs, through the fitting of entry or exit hardware, opting for additional fire protection, and by allowing for either single or double door sets, dependant on your requirements.

We offer a choice of powder-coated colour finishes for our Steel Security Doors, allowing our customers to customise their security solution even further. Additional options for glazing, Door closers, extra locking mechanisms, letterboxes, fixed side, or over panels are also available.

Our Security Doors are installed by our in-house team of expert engineers, making sure that our customers receive a highly professional, efficient and effective installation service for their Steel Doors. We not only install our full range of Security Doors ourselves, but we also carry our expert site surveys to determine the exact requirements of your premises, ensuring that you achieve a solution that directly reflects your security needs.

In instances where there may be a requirement for your Security Door to remain in keeping its surroundings, such as for Listed Buildings, our Bespoke Security Doors provide the perfect solution to providing the appropriate security measures, whilst maintaining the needs of the premises.
